

Natural energy booster

Oxygen in a can

99,5 %

Pure oxygen in a can for energy boost, power and concentration

SUFFICIENT LEVEL OF OXYGEN IN OUR BLOOD WILL HELP US TO:

- maintain energy and vitality
- reduce stress
- increase alertness
- reduce jet lag effects
- improve cognitive abilities (including memory and reaction time)
- manage effects of high altitudes more easily
- optimise sports achievements
- faster muscles and tiredness recovery
- reduce consequences of polluted air on our body

WHY TO USE FEELOXY

FeelOXY cans are filled with high quality pure oxygen and can be used anywhere and anytime. This is the best way to supply the body with supplemental oxygen and achieve real and desired outcomes of work and physical activity.

FeelOXY will:

- reduce the symptoms of fatigue and stress
- increase energy, power and concentration
- impact on your general well – being.

WHO IS IT FOR

- in the business world
- active people - professional athletes and recreation sports enthusiasts
- pilots and passengers of private, sports, business or ultra-light aircrafts, for tandem jumps and gliders
- defense and security use
- long distance driving
- hikers up to 2000 m
- beauty purposes
- young

WHEN TO USE FEELOXY?

- at work or when concentration is decreasing
- when we feel tired
- long distance driving
- on business trips by plane (to decrease jet lag)
- before training – to get energy boost
- during training – for maintaining training power
- after training – for faster recovery
- during studying
- in cities with polluted air
- on higher altitudes (over 2000 m)

BUSINESS WORLD

For those who work all day, are under constant pressure, travel a lot and often in need for high focus.

FeelOXY will help you to meet the challenges of the business world confidently, because it:

- increases mental concentration
- reduces symptoms of stress and sleep deprivation
- increases energy
- reduces jet-lag after business trips by plane

SPORTS ACTIVE PEOPLE

FeelOXY will help you **achieve better sports** results because it helps to:

- increase power
- increase energy
- increase endurance
- reduce regeneration time

FeelOXY is appropriate for professional and recreational athletes

- When practicing aerobic sports (e.g. cycling, running swimming), FeelOXY will mainly help to increase your endurance and gives you energy boost.
- When practicing anaerobic sports (e.g. tennis, weight lifting, football) it will help to increase your strength and power.

- When we are physically active the oxygen saturation in the blood drops – with a few inhalations we fill our blood with oxygen, which body needs to function on peak levels.

- Supplemental Oxygen is not on the list of banned substances issued by the World Anti-Doping Agency (WADA) - **IT IS NOT DECLARED AS DOPING!**

PROHIBITED METHODS

M1. MANIPULATION OF BLOOD AND BLOOD COMPONENTS

The following are prohibited:

1. The *Administration* or reintroduction of any quantity of autologous, allogenic (homologous) or heterologous blood, or red blood cell products of any origin into the circulatory system.
2. Artificially enhancing the uptake, transport or delivery of oxygen. Including, but not limited to:
Perfluorochemicals; efaproxiral (RSR13) and **modified haemoglobin products**, e.g. haemoglobin-based blood substitutes and microencapsulated haemoglobin products, excluding supplemental oxygen.
3. Any form of intravascular manipulation of the blood or blood components by physical or chemical means.

List of Prohibited
Substances and
Methods

PILOTS AND PASSENGERS

FeelOXY will help you to:

- reduce fatigue and sleepiness at the altitudes above FL 100, where the air is thinner
- reduce dizziness and impaired reaction time
- increase the concentration and reduce the level of stress
- improve maintenance of control over the management of aircraft
- improve oxygen saturation in the blood
- reduce the jet-lag effect

DEFENSE AND SECURITY

FeelOXY is suitable for defence and security use as it helps to

- reduce exhaustion during forces training and missions
- increase energy demand before and faster regeneration after extreme exertion
- in the execution of their duties in areas with polluted air and high altitude areas where the air is thinner
- increase the concentration and reducing the level of stress
- in the shortening of the reaction time

LONG DISTANCE DRIVING

FeelOXY will help you on long distance ride, since it:

- reduces exhaustion
- increases endurance
- increases power and energy
- increases response of the body
- increases mental concentration and reduces the level of stress

HIKERS AND TREKKERS

FeelOXY is suitable for the needs of hikers and trekkers,as:

- provide your cells and your body with additional oxygen
- improve your oxygen saturation in the blood, especially at the higher altitudes where the air is thinner
- boost you with energy and power for another physical strain
- reduce the negative effects that come with higher altitudes
- reduce fatigue and sleepiness

WELLNESS

FeelOXY will assist you to feel better in your body.

The usage of oxygen supplement will:

- slow down the ageing process
- help to refresh and rejuvenate skin
- reduce the number and depth of facial wrinkles
- improve the structure and elasticity of the skin
- fill the skin and the body with vital energy

YOUNG

FeelOXY will help also the younger generations, especially with studying and after parties because it:

- increases concentration, which you need to study more effectively
- reduces symptoms of stress and sleep deprivation
- reduces jet-lag, when travelling by plane
- helps in overcoming unpleasant symptoms of hangover, which occurs after the party

ALSO GOOD TO KNOW

- All natural
- No calories
- No artificial substances
- Full can is very light
- All materials from EU
- Filled with high quality pure oxygen of medical quality
- It is not declared as doping by the World Anti-Doping Agency

Our products

- standard can, 3 l of pure oxygen (for 30 breaths/ 6 – 10 applications, 50mm x 183mm, weight 50g) – core product
- large can, 12 l of pure oxygen with different nozzles – sprayer/mask/nasal cannula
(for 120 breaths/24 – 40 applications, 74mm x 290mm, weight 190g)
- packages with pulse oximeter – for measuring heart rate and oxygen saturation in the blood

HOW TO USE IT (with sprayer)

1. Put your finger on the sprayer and hold the can approx. 1 cm from your mouth.
2. Press and hold the sprayer for one second and take a deep breath.
3. Repeat it 3 to 5 times.

There are 3 l of pure oxygen in a standard can, which is enough for approx. 30 intakes.

There are 12 l of pure oxygen in a large can, which is enough for approx. 120 intakes.

Ready for natural energy booster?

Take a breath of pure energy.
